PROGRAM CODE

```
from sklearn.tree import DecisionTreeClassifier

X = [[1, 0], [1, 1], [0, 1], [0, 0]]
y = ['Yes', 'Yes', 'No', 'No']

model = DecisionTreeClassifier()
model.fit(X, y)

a = int(input("Enter first value (0 or 1): "))
b = int(input("Enter second value (0 or 1): "))

print("Prediction:", model.predict([[a, b]])[0])
```

OUTPUT

```
PS D:\AI LAB Vijay> & C:/Users/SAIL/AppData/Local/Programs/Python/Python311/python.exe "d
Vijay/Exp15"
Enter first value (0 or 1): 1
Enter second value (0 or 1): 0
Prediction: Yes
PS D:\AI LAB Vijay>
```
